

Outdoor power supply that can be used on construction sites

Overview

Power Plus has been providing temporary power solutions for the construction industry for over 35 years. We've worked on residential housing projects, commercial & retail developments, civil engineering projects as well as public works projects. From start to finish, we have temporary power solutions for all.

Before work can begin on your construction site, you'll need temporary power. And to get that power, you'll need to work with a company that can determine the power solutions you need. Generators are an obvious option for temporary power but.

Getting temporary power to your construction site is an involved process. Once you vet different power companies and approve a quote.

What is temporary power for construction sites?

What Is Temporary Power for Construction Sites and Why Do You Need It?

Temporary construction power provides a short-term power supply for equipment, tools, lighting and on-site offices. It's vital for performing construction work in areas that are not connected to the electrical grid.

Does a construction site need temporary power?

Without temporary power, most construction sites would be at a standstill. Most of the machinery, tools and equipment you use throughout a project need a power source, but what are the best temporary construction power options for your needs?

.

What type of power do you need for a construction site?

From generators and air compressors to distribution equipment, you have various options to power each jobsite. The type of equipment you use, your construction schedule and the worksite location all play a role in choosing the right type of power supply. What Is Temporary Power for Construction Sites

and Why Do You Need It?

.

How do I choose a temporary power supply for my construction site?

Cables and cable ramps are essential accessories for power generation equipment. Cables help you extend power throughout your jobsite, and cable ramps protect the cables from potential damage in high-traffic areas. Consider the following factors when choosing a temporary power supply for your construction site.

Do you need a power source for a construction site?

Safety systems like cameras and alarms likely need a power source, as well. Site offices: Many construction sites have temporary office setups. These facilities will need power for lights and office equipment. As you think about temporary power for your next project, you'll want to keep in mind a few challenges that might arise.

Do I need temporary power poles for my construction site?

Your construction crew and subcontractors are scheduled to begin work in a month or two. Yet, you still haven't secured temporary power for your construction site. Most likely, you'll need temporary power poles to get enough energy for the trailers and equipment on your job site. The first step is to consult the experts.
