

PV Inverter Outlook 2025

Overview

Set for launch in the latter half of 2025, the inverter will offer power capacity of up to 20kW and is engineered to support complete home backup. Additionally, increasing demand for energy storage solutions, particularly lithium-ion battery systems, also propels inverter adoption.

PV Inverter Market size was valued at USD 13.32 billion in 2023 and is estimated to expand at a CAGR of 7.7% between 2024 and 2032. A photovoltaic inverter, referred to as a solar inverter, is an essential device in a solar energy system. It converts DC (direct.

The global demand for solar energy has been steadily increasing owing to the enhanced efficiency of these systems. Higher efficiency means that more of the captured sunlight is.

The worldwide outbreak of coronavirus has had tremendous impact on the economy around the world. The COVID- 19 influenced the supply chain, elevating the prices of.

String PV inverter market dominated around USD 13.9 billion revenue in 2022. String inverters, which process the DC electricity from.

What was the market size of PV inverter in 2024?

The market size for PV inverter was valued at USD 34.6 billion in 2024 and is projected to reach USD 90 billion by 2034, growing at a CAGR of 9.5% during the forecast period. What was the market share of the three-phase segment in 2024?

.

How big is the global PV inverter market?

The global PV inverter market was valued at USD 34.6 billion in 2024 and is estimated to grow at a CAGR of 9.5% from 2025 to 2034. The paradigm shift toward the integration of renewable energy resources will fuel the adoption of efficient systems.

Will inverter revenue rise in 2025?

However, European inverter revenue in 2025 will remain below 2023 levels as high levels of competition forces price reductions in the market. Elsewhere, revenue in the United States is forecast to rise by 16% in 2025 as the residential market recovers from a slowdown in demand and inventory oversupply.

How is PV inverter market segmented?

Based on phase, the PV inverter market is segmented into single phase and three phase. The three phase segment held 86% market share in 2024, owing to swift industrial development favored by commercialization throughout the emerging countries, along with considerable operational flexibility across various applications.

What is the value of PV inverter industry?

Based on the product, the industry is segmented into string, micro, and central categories. The PV inverter market was valued at USD 25.5 billion, USD 29.9 billion, and USD 34.6 billion in 2022, 2023, and 2024, respectively.

Is global inverter manufacturing overcapacity a problem in 2025?

S&P Global Commodity Insights estimates that global inverter manufacturing capacity topped 1 TW at the start of 2025, far ahead of forecasts for 2025 demand at 538 GWac. Overcapacity woes are added to by new entrants emerging from adjacent industries such as the white goods and portable electronics industries.
