

Palau Outdoor Energy Storage

Overview

What is Palau solar & battery storage?

The Palau solar and battery storage project not only bolsters the country's energy independence but also highlights the potential for renewable energy to power nations across the Pacific. As Palau paves the way, it inspires others to follow suit, driving the transition towards a greener and more sustainable world.

When did Palau launch its first solar and battery energy storage system?

Palau on June 3 launched its first solar and battery energy storage system (BESS) project on Friday. The project was made possible by Renewable company Alternergy Holdings Corp. and its subsidiary Solar Pacific Energy Corporation.

How much does Palau solar project cost?

In a press release from the company, it said the Palau solar project boasts a capacity of 15.3 MWp solar PV and 12.9 MWh BESS, making it one of the most significant foreign direct investments in the country. The project cost USD29 million, the venture marks a remarkable milestone for Alternergy.

What will Palau's solar PV project do?

The project, which is also Palau's first grid-scale solar PV plant, will contribute significantly to the country's nationally self-determined contribution to meeting global climate targets as agreed in the Paris Accord. These include reaching 35% renewable energy, and reducing energy sector emissions to 22% below 2005 levels, by 2025.

Will a new power plant revolutionise Palau's energy landscape?

With an investment of \$US29 million, the installation is poised to revolutionise Palau's energy landscape, meeting more than 25 per cent of the country's electricity demands. Situated in Ngatpang state on Babeldoab, Palau's largest

island, the project connects to the central grid, enabling the distribution of clean power throughout the archipelago.
