

# Panama Energy Storage and Distribution System

## Overview

---

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

Does Panama have a transmission grid?

solar PV. The trust in Panama's electricity market is reflected in the growing capacity of solar and wind renewable generation, along with the implementation of distributed solar PV. However, in this edition of the World Energy Issues Monitor, the transmission grid emerges as the primary uncertainty and a prior.

How much electricity does Panama produce?

Panama produced 10.9 TWh of electricity in 2020; hydro power accounted for 67.2% of all power generated, followed by fossil fuels (24.3%), wind (5.3%), solar (2.9%) and other renewable sources (0.3%).

Who regulates the electricity sector in Panama?

The ASEP (Autoridad Nacional de los Servicios Públicos) is responsible for regulation of the electricity sector in Panama. The ASEP oversees all aspects of Panama's electrical sector. Panama does not have a national oil company. Naturgy is the leading energy distributor in Panama.

Does Panama have a power station?

Panama's older Bahía las Minas power station has shut down completely, while the newer Cobre Panamá power station has committed to converting to natural gas by December 2023. In 2014, approximately 15 million long tons of thermal coal passed through the Panama Canal.

What percentage of Panamanians have reliable electricity?

While 94% of Panamanians have access to reliable electricity , rates of access in primarily indigenous areas are drastically different; in Comarca Ngöbe-Buglé the percentage of households with reliable electricity drops to approximately 4%.
