

# Pangjia Energy Storage Project

## Overview

---

What is Pangea energy storage system?

Pangea is a 100MW/200MWh energy storage system that will provide energy security and grid stability services to South Australia.

What is Pangea energy-Port Augusta battery energy storage system?

The Pangea Energy-Port Augusta Battery Energy Storage System is a 50,000kW energy storage project located in Port Augusta, South Australia, Australia. The rated storage capacity of the project is 200,000kWh. The market for battery energy storage is estimated to grow to \$10.84bn in 2026.

Does Pangea have a battery storage project?

It will also procure other products and services from CellCube, which may include an electrolyte service as a co-funding mechanism, it said in the press release. The battery storage project was launched by Pangea in 2016.

What will Pangea energy do with cellcube?

Pangea Energy will build, own and operate the system, deploying CellCube's vanadium redox flow technology in the AUD-200-million (USD 224.2m/EUR 123.7m) project. It will also procure other products and services from CellCube, which may include an electrolyte service as a co-funding mechanism, it said in the press release.

## Pangjia Energy Storage Project

---

### The Investment , Pangea Energy

Pangea will combine intelligent energy storage management with control technologies and fast-response batteries, thereby creating a hybrid system that is ideal for utility scale storage.
