

Peruvian lithium battery processing

Overview

Peru is evaluating a potential lithium iron phosphate (LFP) battery production plant in the department of Moquegua, which would be the first such facility in Latin America. Does Peru produce lithium batteries?

"We have a lot of reserves and we think this is an opportunity and a challenge to carry out (lithium) extraction and value-added production," Chavez said. To be sure, Peru currently produces no lithium and no country in Latin America produces lithium batteries at a commercial scale even if they do mine lithium.

Are there lithium deposits in Peru?

Because of the rising demand for lithium batteries for electric vehicles, there has been a boom in interest in exploring Peru's lithium deposits recently. The finding of a sizable hard-rock lithium deposit in the Puno region of southern Peru was announced by the Canadian mining company Plateau Energy Metals Inc. in 2008.

Will Peru become a major producer of uranium and lithium?

Peru may emerge as a significant producer of both metals in the upcoming years if American Lithium is successful in advancing the Macusani uranium project as well as the Falchani lithium project. Since uranium and lithium are both necessary metals for the clean energy transition, this would be tremendous development.

Will Peru allow American Lithium Corp to mine lithium in 2023?

The Peruvian government declared in April 2023 that it would allow American Lithium Corp. to conduct lithium exploration in a new region close to the Falchani mine. In addition, a new lithium mining law is being developed by the government and is anticipated to be passed in 2024.

How difficult is it to extract lithium from Peru?

Peru's hard rock reserves are located in remote regions, which creates

another difficulty for lithium extraction. Transporting the rock to processing plants becomes challenging as well as expensive as a result. Numerous companies are developing alternatives to lithium extraction from Peruvian hard rock deposits, despite the difficulties.

Can Peru develop a battery industry?

"We are already starting to act to see if we can develop a battery industry," said Jaime Chavez, Peru's vice minister of mines, at the Perumin mining industry conference. Peru is the world's No. 2 copper producer and an attractive destination for global miners.

Peruvian lithium battery processing

[Falchani Lithium Project, Puno, Peru](#)

The project will include the development of an open-pit lithium mine and an ore processing plant. The conceptual flow sheet design includes conventional crushing, rotary ...
