

Polish energy storage project companies

Overview

What is Poland's energy storage program?

The program , “Electricity storage facilities and infrastructure for improving the stability of the Polish power grid,” is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

What is Polish Energy Storage Association?

Polish Energy Storage Association – together we are building a modern, solid and secure electric power system in Poland. We are integrating innovative companies and organisations involved in developing the power sector and environment protection, we are promoting and supporting energy storage facilities.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland’s electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country’s energy security.

What are Poland's energy storage subsidy programs?

Poland’s 2024-2025 energy storage subsidy programs are a key element in the country’s energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

How will Polish energy sector evolve in 2025?

Innovation in the wind power and energy storage sector is expected to increase in 2025. The “Moja Elektrownia Wiatrowa” program plays an important role in the modernization of the Polish energy sector. It supports the

development of energy storage, improves energy efficiency and increases the share of RES in the country's energy mix.

How much money will Poland receive from the modernization fund?

Funding for the program comes from the Modernization Fund (FM), which underscores the importance of the project for modernizing the energy system. By 2030, Poland could receive about 60 billion zlotys from the FM for energy transition goals. The call for applications runs from June 17, 2024 to June 16, 2025, or until funds are exhausted.
