

Prices of photovoltaic panels on rooftops in Spain

Overview

As of 2024, the average cost of solar panels in Spain ranges between €1,000 to €2,500 per installed kilowatt (kW). This means that for a typical home system of around 5 kW, you could expect to pay between €5,000 to €12,500 before any government incentives. How much does a solar self-consumption photovoltaic installation cost in Spain?

The price of a solar self-consumption photovoltaic installation for a single-family home is around €1,500 for each kilowatt generated (taxes not included). If we take into account that a typical household consumes around 4.4 kW, the initial cost of a project of these characteristics in Spain would be around €6,500 (plus VAT).

How much does a photovoltaic system cost?

The result will correspond to the number of years you need for the investment to be returned. Up until now, the costs of a photovoltaic system at home have been specified. But let's talk about the prices of the panels in question, which are calculated in terms of cost per watt, usually between 600 and 800 euros per square metre.

How to calculate the cost of a photovoltaic installation?

To calculate the price of a photovoltaic installation, to the cost of the panels, we have to add inverters, batteries, the cost of other materials such as wiring, the structures for installing the panels, the bidirectional meter to monitor how much energy we produce, as well as the labour costs.

Where to install a roof panel in Spain?

A flat top roof is the best place to install this type of panel in Spain. For the house above we needed a 100m² flat roof. However if you cannot locate them on the rooftop, then you could also locate them on the ground or on a pergola. On ground is a great option if you have lots of square metres of land.

Should you install photovoltaic panels in your home or business?

Installing photovoltaic panels in a home or business has many advantages. One of the most compelling reasons is their profitability, because energy self-consumption installations allow us to save money on our bills from day one, and for many years. Added to that, the cost of their maintenance is minimal throughout their useful life.

Why should you install a photovoltaic system in your home?

Reducing electricity costs has been the biggest motivation to install a photovoltaic system in homes, not to mention the positive impact on the environment. By 2026, nearly 29.3 gigawatts will have been installed in Spain, making Spain the second country in Europe with the most solar power.
