

# **Ranking of South Korea s large energy storage cabinets**

## Overview

---

Is South Korea a leader in energy storage?

South Korea, a global powerhouse in the manufacturing of advanced electronics and automotive products, has in recent years also taken a prominent role in the energy storage industry. This East Asian country is home to some of the world's leading energy.

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

Does South Korea have a battery storage system?

In terms of battery storage system deployment, South Korea stands among the global leaders. By the end of 2022, the cumulative installed capacity of battery storage in the country had reached an impressive 4.1 gigawatts. In October 2023, the South Korean government unveiled the Korean Energy Storage Systems (ESS) industry development strategy.

Which energy storage solutions are used in South Korea?

In South Korea, various energy storage solutions are used, including pumped hydro, electrochemical batteries, and others. Depending on the energy storage technology and delivery characteristics, an ESS can serve many roles in the electricity market.

How will Korea contribute to the energy storage sector?

With Seoul and Busan serving as pivotal hubs, and companies like Samsung SDI, LG Chem, Hyosung Heavy Industries, Doosan Heavy Industries & Construction, and Kokam leading the charge, the nation is set to continue its impactful contribution to the energy storage sector.

Will South Korea beat us energy storage capacity in 2019?

Last year, a hearty government incentive kicked off a storage installation gold rush, which thrust South Korea ahead of the U.S. for annual installed energy storage capacity. It delivered 1.07 gigawatt-hours for the year according to Wood Mackenzie data, and is on track to beat that in 2019.
