

Romania exports photovoltaic modules to Belgium

Overview

How many largescale photovoltaic projects are there in Romania?

Here are some considerations based on this research. Romania has made significant strides in developing large-scale photovoltaic (PV) projects, contributing to its renewable energy goals. As of the latest data available, there are over 880 large-scale PV projects in Romania, boasting a cumulative capacity of approximately 46,600 MW.

Where does Romania import electricity?

Romania exports and imports electricity to and from neighboring countries, including Hungary, Bulgaria, Serbia, Ukraine, and Moldova, and is also part of the European Union's internal energy market, which aims to create a single, competitive market for electricity and gas across EU member states.

Will Romania see a surge in photovoltaic projects in 2024 and 2025?

The data shows that 2024 and 2025 might witness a surge in the completion of large-scale photovoltaic (PV) projects in Romania, with over 400 projects expected to contribute significantly to the country's goals. Their total capacity is estimated at 30.5 GW. Obviously, this is the trickiest area in this report.

What is the monitor of Romanian photovoltaic projects?

The Monitor of Romanian Photovoltaic Projects is a tool offering thorough summaries of large-scale PV projects happening all over the country. However, there are some issues that need to be carefully thought through because they could have an effect on many different groups of people.

What is the landscape of largescale PV projects in Romania?

The landscape of large-scale PV projects in Romania encompasses a wide range of installed capacities, catering to diverse energy needs and project objectives. By categorizing these projects based on their installed capacity, we gain insights into the scale and scope of solar energy deployment in the

country.

Who manages the electricity transmission system in Romania?

The electricity transmission system in Romania and the interconnection system with its neighboring countries is managed and operated by Transelectrica SA company (the Romanian TSO). They also manage the market operation, the grid and market infrastructure development, and the security of the national energy transmission system.
