

# **Russian 5G base station power equipment cabinet**

## Overview

---

Are there a 5G base station in Russia?

And according to Russian working solutions, there are only prototypes and trial versions of base stations such as LTE-Advanced, they noted. Instances for 5G networks that were created by Rostec did not appeal to operators.

Who created the first base stations in Russia for 5G networks?

On September 18, 2020, it became known about the creation of the first base stations in Russia for 5G networks. The development is carried out by the leading research center (FACE) "Global Wireless Communication Systems" on the basis of the company " GlobalInformService." [Read more here.](#)

Will 5G be built on domestic equipment in Russia?

In early October 2020, the Ministry of Digital Development of the Russian Federation announced that 5G networks in Russia will be built on domestic equipment. The relevant manufacturers will receive benefits. The project for the construction of 5G on Russian equipment is being considered.

How many components should a 5G base station include?

By 2024, as Sergey Nakvasin, Deputy General Director, Director for Digital Technologies of the Digital Economy ANO, explained to the publication, each base station for 5G networks should include 40% of domestic components. This level of localization will allow you to consider the equipment Russian and allow it to be used in Russia.

Will Russia force Telecom operators to use domestic 5G hardware?

According to Kommersant, the Ministry of Telecom and Mass Communications has already taken the initiative to force Russian telecom operators to use mainly domestic 5G hardware.

Who created 5G equipment in Russia?

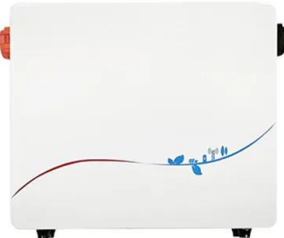

On July 11, 2019, it became known about the start of development in Russia of equipment for fifth generation (5G) networks. Such equipment was created by the Sozvezdiye concern, which is part of the Roselectronics holding of the Rostec State Corporation . [Read more here.](#)
