

Rwanda Southern Power Grid Energy Storage

Overview

Does Rwanda have a power grid?

Rwanda is planning to expand from 276 MW of grid power in 2022 to 556 MW in 2024 and may import some additional electricity from neighboring countries. In addition, it is installing small solar units throughout the country to ensure that households located in off-grid areas have access to electricity, or to help deal with power outages.

Where can I find information on energy in Rwanda?

For more information on energy in Rwanda, please visit the websites of the Rwanda Ministry of Infrastructure, RDB, the Rwanda Utilities Regulatory Authority, and the Rwanda Energy Group. They provide information on electricity access, both on-grid and off-grid, including solar home systems and mini-grids.

How much electricity will Rwanda supply by 2024?

By 2024, Rwanda plans to supply electricity to 100 percent of the population. This will be achieved through grid expansion (52 percent) and off-grid technologies (48 percent).
