

Seychelles New Energy Station 100KWh

Overview

- Deenapanray, Prakash; Jean Louis, Andrew (2018). "Technology Action Plan and Project Ideas for the Power Sector". (PDF). , Seychelles: Ministry of Environment, Energy and Climate Change, Seychelles (published 17 May 2018). p. 15.
- (PDF) (Report). July 2016. Retrieved.

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

Why do Seychelles have high power costs?

Like many other small island developing states (SIDS), Seychelles faces extremely high and fluctuating power costs resulting from dependency on mineral oil products for power generation and fuel for transportation.

Why is the PUC planning a power transition in Seychelles?

For the next four to five years, the PUC has carefully scheduled this transition in order to guarantee a stable energy supply that can sufficiently sustain the nation's economy. Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

What is the project from Seychelles?

The project from Seychelles is one of ten projects selected by the Climate Investment Platform. This summary is generated by Google AI, and its accuracy and relevance may vary. Please consult the detailed list of results for greater precision.

How does UNDP support the Seychelles Energy Commission?

Through the Climate Investment Platform, UNDP is supporting the Seychelles

Energy Commission's initiative to make the adoption of renewable energy accessible to the population that would otherwise not be able to afford to do so.

How will Seychelles meet the 2030 Agenda?

The Government of Seychelles will identify large rooftops suitable for PV installation. Consumers can then buy a share of the system and pay it back by monthly installments through electricity bills or other mechanisms. Meeting the ambitious 2030 agenda requires a paradigm shift from the traditional way of doing things.
