

Small Solar Onsite Energy Photovoltaic Connection

Overview

Why should you start a small Solar System?

Starting with a small solar system is not just about saving on electricity bills; it's a step towards sustainable living. As you expand your setup, you'll not only increase your energy independence but also contribute positively to the environment. Remember, every small effort counts in the larger goal of a greener planet.

Does Oncor offer a solar photovoltaic program?

Customers should compare plans carefully to maximize their savings on electric usage. Oncor has a solar photovoltaic program that helps customers find service providers, and offers incentives that may offset initial costs. Visit takealoadofftexas.com to learn more about participating.

How do I make the most of small Solar panels?

Here's how you can make the most of small solar panels: Choose the Right Panel Size: Understand the power requirements of your devices. A 10 to 20-watt panel is usually sufficient for charging small electronics or powering a light bulb. Positioning is Key: Maximize solar intake by positioning your panel where it gets the most sunlight.

Should you consider a basic solar setup?

When considering a basic solar setup, it's crucial to weigh the initial costs against the long-term benefits. It's a balance between your environmental goals and practical budget constraints.

Small Solar Onsite Energy Photovoltaic Connection

RESIDENTIAL AND SMALL COMMERCIAL

Once you've selected an installer, they will communicate with Oncor, file an application for either a certified residential system or certified small commercial system, and begin the interconnection ...
