

Solar Integrated Machine Remote Control System

Overview

We manufacture many of the custom components we provide to our high standards for: integrated systems, grid-tie applications, water pumping, security and residential lighting, SCADA/instrumentation, island electrification, back-up or emergency power, solar and stand alone solar hybrid packages for remote.

We offer global installation services and training on renewable power system design, installation, operation and maintenance for audiences and organizations around.

We offer a variety of monitoring, analysis, and software products and services to the solar community (including electric utilities, power providers, institutions, and individuals). Our.

Are solar water pumps integrated with a remote monitoring system?

Our Solar Water Pumps are integrated with a Remote Monitoring System, due to which they are easy to configure, provide rich information to technicians and customers plus they can be operated in all weather conditions.

What is a solar pump controller?

Users can also switch on and off and schedule their timing if there is a limited supply of water in a specific location to avoid waste. Solartive - An Indian manufacturer of Solar Pump Controller with RMS. The Solar Pump Controller is designed to run Electric three phase submersible pumps and motors.

What is a Mapps® solar power system?

Solar Electric Supply's MAPPS® are stand-alone solar power systems, engineered to support a wide variety of remote power requirements. We supply photovoltaic and other renewable energy products to dealers, contractors, commercial and industrial accounts, and government agencies.

What is a solar pump monitoring gateway?

This gateway enables the remote monitoring of solar pumps. The interactive

web portal represents previous and aggregated data, comparative analytical diagnosis, and a guided root cause for fault analysis. All data is logged and can be securely reviewed and analyzed from any location of the pump at any time.

How does a smart controller work?

Our smart controller integrates online, offline and Wi-Fi functions and supports a wide range of frequency bands due to which it can operate in any remote location around the world. All of our pumps have a digital controller which controls the pump system and provides information about what the system is doing.

What types of solar power systems are available?

Pad & Pole-mounted, Class 1 Div 2, Microgrid and AC/DC UPS solar battery enclosure systems. Solar Electric Supply's MAPPS® are stand-alone solar power systems, engineered to support a wide variety of remote power requirements.

Solar Integrated Machine Remote Control System

The Ultimate Guide to Smart Solar Generators and IoT Integration

IoT-enabled solar generators come with advanced features like real-time monitoring, predictive maintenance, and remote control. These capabilities enhance efficiency, ...
