Solar Electricity

Solar electric systems transform light from the sun into electricity, all without the need for any moving parts. The electricity-generating process outlined in this article is called photovoltaics, ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power. Solar panels use the photovoltaic effect to convert light into an electric current. Concentrated solar power systems use lenses or mirrors and solar tracking systems to focus a large area of sunlight to a hot spot, often ...
