

Somaliland Container Power Plant

Overview

What is a microgrid in Somaliland?

Somaliland's power grid supplying the city of Berbera, home to the largest port in the horn of Africa, is being monitored and controlled using microgrid technology. The microgrid consists of two solar plants with a total capacity of 8MW, a containerised lithium-ion power storage system with a capacity of 2MWh and three modern diesel generators.

Can a microgrid increase solar power in Somaliland?

This project in Somaliland is one of the first in the world to use the company's patented Maximum Inverter Power Tracking (MIPT) technology to increase the share of solar power in microgrids. Hosted by BEC utility, Somaliland's power grid supplying the city of Berbera is being monitored and controlled using microgrid technology.

Does Somaliland need a solar grid?

Somaliland has one of the world's highest energy prices punctuated with frequent and often long-lasting power cuts. So far, only limited investments have been made into the generation of clean energy, among them a solar mini grid in Berbera, funded by the Abu Dhabi Fund for Development.

Does Somaliland need a reliable energy supply?

Somaliland's government acknowledges the lack of reliable energy provision as a major constraint to development. The government plans to ensure that all citizens have access to affordable energy from local and renewable sources by 2030. This goal is ambitious.

Where is Somaliland's main port?

ED RAM/AFP via Getty Images Somaliland's main port, at the city of Berbera, accounted for two-thirds of the country's revenues in 2020. Over the years, these revenues have mostly gone into the central state coffers, while the

development of Berbera has been neglected.

Why is energy so expensive in Somaliland?

The government plans to ensure that all citizens have access to affordable energy from local and renewable sources by 2030. This goal is ambitious. Electricity across Somaliland is privatised and relies on fossil fuel, mainly diesel, which is imported from the Arabian peninsula. Energy is, therefore, costly and unsustainable.

Somaliland Container Power Plant

Design, Supply, Installation, Testing, and Commissioning of ...

Contract title: Design, Supply, Installation, Testing, and Commissioning of 12MWp Solar PV Power Plant with 36MWh of Battery Energy Storage System Including a 13.5km of ...

[Product Information](#)

Somaliland: Solar Power and Microgrid Intelligence for an Urban Power

For this purpose, two solar plants with a total capacity of 8 megawatts, a containerized lithium-ion power storage system with a capacity of 2 megawatt hours, and three ...

[Product Information](#)

Somaliland: Berbera city's growth is being held back by a power ...
