

# Spanish chemical energy storage project

## Overview

---

The Erasmo Solar PV park – Battery Energy Storage System is a 80,000kW lithium-ion battery energy storage project located in Saceruela, Castile-La Mancha, Spain. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2021 and will be.

The Sun2Store Project – Thermal Energy Storage System is a 100,000kW molten salt thermal storageSpain. The rated storage capacity of the project is.

The Caceres Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Caceres.

The Casablanca Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Talarrubias.

The La Africana Solar Power Plant – Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Posadas, Spain.

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

Will Spain back energy storage?

A public consultation exercise about the proposed funding program opened on Monday and will close on Friday. Spain already backs energy storage with more than €600 million of NextGenEU funding which was allocated as part of Spain's, post-Covid Recovery, Transformation, and Resilience Plan.

What is the electro-chemical battery storage project?

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2021 and will be commissioned in 2024. The project is owned and developed by Soto Solar.

## Spanish chemical energy storage project

### What are the chemical energy storage power station projects?

1. Chemical energy storage power station projects are systems designed to harness, store, and convert chemical energy into usable forms of power.
