

Sudan Wind Solar Energy Storage Project

Overview

What can Sudan do with abundant onshore wind?

With abundant onshore wind, Sudan can adopt successful African strategies and attract regional and international energy initiatives, such as the Africa-EU partnership program, the Africa Clean Energy Corridor, and Power Africa .

Does Sudan have wind energy?

As for wind energy, Sudan is one of eight African countries with significant onshore wind capacity. Wind energy has the potential to meet an estimated 90% of the country's annual energy demands . compares the country's estimated onshore wind capacity with that of other African countries . Figure 10.

Is Sudan's Energy Sector Sustainable?

Further, Sudan's energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures . Financial sustainability could be achieved by introducing gradual tariff adjustments.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in Sudan.

What are the energy production resources in Sudan?

More than 96% of this capacity was derived from fossil fuels and hydropower; the rest was dependent on RE, viz., solar and biomass . The country started to increase its production from solar resources, leading to an increase in capacity from 14 MW in 2019 to 18 MW in 2020. shows the breakdown of energy production resources in Sudan.

Sudan Wind Solar Energy Storage Project

Sudan solar project: 1 Million Dollar Initiative for Clean Energy

The United Nations Development Programme (UNDP) and the Government of Japan have announced a \$1 million initiative to bring solar-powered infrastructure to the Blue ...
