

# Sweden installs solar power for home use

## Overview

---

A French renewable energy company and Swedish solar developer have recently launched the Scandinavian country's largest utility-scale solar power installation, which is expected to reach 100 gigawatt hours (GWh) of green energy per year. How much solar power is installed in Sweden?

A total of 460 MW of solar power was installed in Sweden during the first half of the year, which corresponds to an additional electricity production equivalent to the annual consumption (5,000 kWh/year) of 80,000 villas with geothermal heating. Also see: Further growth of the Swedish PV market.

Who is a typical residential solar PV buyer in Sweden?

Based on the above presented analysis we can create our typical residential solar PV buyer in Sweden. This would be a person between 45-65 years old, with an income above 500 000 SEK per year, and living in a rural area closer to a larger city.

How many photovoltaic installations are there in Sweden?

Up to and including July 2024, 27,500 photovoltaic installations were connected in Sweden, just under a thousand more than in the same period in 2022 (26,600) and twice as many as in the first half of 2021 (13,500). In 2023, 66,000 installations were connected during the same period.

Does Sweden have a new solar PV system in 2024?

The expansion of PV systems in Sweden in 2024 has so far been roughly on a par with 2020, but well below the record year of 2023. The number of newly connected solar PV installations in 2024 in Sweden is back at the same level as in 2022, but far below the record year of 2023, according to new monthly statistics from Svensk Solenergi.

How many households in Sweden have solar PV systems?

Breaking down this data geographically, we can see that there is a large

variation between areas. In some areas of Sweden, up to 40% of single-family households in the >1MSEK per year income category has installed solar PV systems, while in others its below 10%.

Does Sweden have a roadmap for solar PV?

Sweden lacks a roadmap or strategy on solar PV, but there are some reports by the Swedish Energy Agency including aspects on potential, barriers, roadmaps, etc.
