

Syrian new energy battery cabinet deformed

Overview

Does Syria still have electricity?

Most Syrians still live in dimness. Syria's heavily damaged electrical grid and gas refineries cannot meet domestic demand, so the state rations power to just two hours of electricity a day. Omar Shaqrouq, Syria's new electricity minister, faces major challenges in providing power services to his war-ravaged country.

What happened to Syria's power infrastructure?

Much of Syria's power infrastructure, including its electrical grid and gas refineries, were destroyed during years of civil war. Although Syria once produced enough petroleum to be a fuel-exporting powerhouse, tough international sanctions have prevented its export since 2011.

What is the electricity crisis in Syria?

Syria's Electricity Crisis Most of Syria's electricity is produced by fossil fuels, including 57.3% from oil and 38.4% from natural gas in 2022. A lack of unity and the dismal conditions of the country's electrical grid and refineries have caused a major supply chain crisis and nationwide electricity shortages.

How much power will Syria have in the next 5 years?

In the next five years, he said, Syria is aiming to increase power capacity to 12,000 megawatts. Much of Syria's power infrastructure, including its electrical grid and gas refineries, were destroyed during years of civil war.

Why are battery-powered lights so popular in Syria?

Small, battery-powered lights are popular in Damascus, Syria's capital, because buying fuel for generators can be expensive and because the generator fumes are smelly and are linked to cancer risks. As a result, most residents simply accept the darkness.

Can Omar shaqrouq provide electricity to Syria?

Omar Shaqrouq, Syria's new electricity minister, faces major challenges in providing power services to his war-ravaged country. Now, Syria's new coalition of leaders is trying to prove to Syria's estimated 23 million citizens that it can provide services, like collect the trash and fix the electricity.
