

Telecommunications companies cannot install base stations

Overview

Can a telco install a mobile phone base station?

All mobile phone base stations must stay within the safe limits of electromagnetic energy (EME). Telcos can only install a mobile phone base station if they can show it will stay in the safe limits. A telco can install a temporary base station to either: minimise service disruption during the maintenance or replacement of an existing facility.

Who approves a mobile phone base station?

There are rules telcos must follow to install mobile phone base stations. The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land. To find out if a base station requires approval under local government, state or territory planning law, please contact your local council.

Do mobile phone base stations comply with EME limits?

Mobile phone base stations must comply with safe electromagnetic energy (EME) limits and Telcos demonstrate compliance by providing an Environmental EME Report showing the level of RF EME from the base station.

Can telcos install telecommunications equipment without planning approval?

There are Commonwealth laws that allow telecommunications companies (Telcos) to install smaller types of telecommunications equipment, such as cables and antennas, without the need for planning approval from local government.

Where can I find information about mobile phone base stations?

Information about proposed and current mobile phone base stations is available on the Radio Frequency National Site Archive (RFNSA) at [You can subscribe to receive information about future installations of Small cells are installed by Telcos to provide improved coverage and capacity in local areas](#)

for both 4G and 5G services.

What if a mobile phone base station is low-impact?

If a base station is low-impact or no approval is required under the local government, state or territory planning process, telcos consult with you by following the applicable consultation process in the Mobile Phone Base Station Deployment Code. All mobile phone base stations must stay within the safe limits of electromagnetic energy (EME).
