

The latest energy storage power station foundation

Overview

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

Why should you choose Landshut power stations?

Our plants and power stations provide a wide range of additional benefits, from flood protection to grid stability and water purification. A central control room at the company's German hydropower headquarters in Landshut ensures that the power stations work together to meet demand.

Why is Germany's largest hydropower operator a reliable power supply?

As Germany's largest hydropower operator, we are thus contributing to a reliable power supply in the south and demonstrating our commitment to the energy transition. The 160-megawatt (MW) power plant has a drop height of 209 meters and can store approximately 850 megawatt-hours (MWh) of electricity in the form of pumped water.

The latest energy storage power station foundation

[Highlights from China -- China Energy Storage Alliance](#)

The notice requires power grid enterprises to ensure power supply, guarantee grid safety, and promote the accelerated development of new energy, while making reasonable ...

Uniper pours EUR 250m into reviving pumped-storage HPP in ...

German energy group Uniper SE (ETR:UN0) said on Thursday that it will invest around EUR 250 million (USD 268.2m) to re-commission its Happurg pumped-storage ...

[Product Information](#)

[The world's first 300-megawatt energy storage power ...](#)

In the field of compressed air energy storage, it will achieve world-leading stand-alone power, energy storage scale, and conversion efficiency. A ...

[Product Information](#)

Pioneering energy storage system lights up 'roof of the world'

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to the ...

[Product Information](#)

GRADE A BATTERY

LiFePO4 battery will not burn when overcharged or over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

[What are the new energy storage power stations? . NenPower](#)

The concept of new energy storage power stations has gained substantial traction as the demand for renewable energy rises. These facilities are designed to capture excess ...

[Product Information](#)

[Technologies for Energy Storage Power Stations Safety ...](#)

As large-scale lithium-ion battery energy storage power facilities are built, the issues of safety operations become more complex. The existing difficulties revolve around ...

[Product Information](#)

The world's first 300-megawatt energy storage power station ...

In the field of compressed air energy storage, it will achieve world-leading stand-alone power, energy storage scale, and conversion efficiency. A buildable solution is provided.
