

Total cost of 3 kilowatt photovoltaic panels

Overview

On average, a 3 kW solar panel system costs \$9,150, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 3 kW solar panel cost?

On average, a 3 kW solar panel system costs \$8,250, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 3 kW solar panel system in your state.

How much energy does a 3KW solar panel produce?

If you want to learn more, check out our full guide to solar panel costs. How much energy will a 3kW solar panel system generate?

A 3kW solar panel system in the UK will produce an average annual output of around 2,550kWh, if it's dealing with typical UK irradiance. This means you'll usually produce roughly 85% of your system's peak power output.

How many solar panels do you need for a 3KW system?

How many solar panels you'll need in order to construct a 3kW system will completely depend on your panels' peak power ratings. For example, if your installer only has 300W solar panels in stock, you'll need 10 panels. Or if you get 430W panels, you'll have seven solar panels in your 3kW system.

How much does a 3KW off-grid solar system cost?

For a 3kW off-grid system, it is recommended to purchase 10 or more panels to ensure sufficient energy generation. Additionally, you would need approximately 19 kWh worth of lithium polymer batteries to provide a full energy cycle. The cost of the batteries required to run a 3kW off-grid solar system can amount to approximately \$8,883.

How much roof space do you need for a 3KW solar panel?

You'll typically need 22.85 square metres (m²) of roof space for a 3kW solar panel system. This takes into account the average height and width of a solar panel – which combine for a total size of around two square metres – plus the additional space installers tend to leave.

How long does it take to pay off a 3 kW solar panel?

Everyone's exact timeline to pay off a 3 kW solar panel system is different, but it has been estimated that the process will last between 10 and 14 years.

Please keep in mind though – these numbers are just approximations, as they can differ greatly depending on your individual energy needs, regional solar rates and financing methods.
