

# **Trinidad and Tobago 5G communication base station wind power construction**

## Overview

---

Could wind energy be a solution for Trinidad & Tobago?

Setting the Path for Wind Energy Generation in Trinidad and Tobago In order to fulfill Trinidad and Tobago's expanding energy needs while reducing greenhouse gas emissions, wind energy has emerged as a possible answer.

Why is offshore wind important in Trinidad & Tobago?

Offshore wind also reduces the issue of land usage associated with other forms of renewable energy, such as solar energy. Trinidad and Tobago possesses facilities including industrial ports, and equipment such as heavy-lift cranes that can support the wind energy industry during the construction and operations phases.

How can Trinidad and Tobago accelerate the energy transition?

Effectively, Trinidad and Tobago's energy transition must be accelerated. NGC is playing a critical role in advancing the energy transition through investments, strategic partnerships and collaboration for national policy, strategy and project development.

Does Trinidad and Tobago support decarbonisation?

Trinidad and Tobago has clearly signalled its stance as supporting decarbonisation through its iNDCs, the National Climate Change Policy, the National Environmental Policy and the Government's Vision 2030. However, renewable energy is yet to be incorporated into the laws that govern power generation in Trinidad and Tobago.

Can wind be harnessed in Trinidad & Tobago?

Some challenges will need to be overcome before wind can be harnessed, including legislative roadblocks and capital considerations. As a signatory to the 2015 Paris Agreement, Trinidad and Tobago has made a commitment towards the world's efforts to limit global warming to 1.5°C or less compared

to pre-industrial levels.
