

Tuvalu Solar Power Home System

Overview

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti 's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

Renewable energy in Tuvalu is a growing sector of the country's energy supply. has committed to sourcing 100% of its from .

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of .

In 2014 the Tuvalu Electricity Corporation (TEC) began implementing a Master Plan for Renewable Energy and Energy Efficiency (MPREEE) through the Tuvalu Energy Sector Development Project (ESDP), which builds on the Tuvalu National Energy.

The led by made a commitment under the , which was signed on 5 September 2013, to implement power generation of 100% renewable energy (between 2013 and 2020). This commitment is.

On 27 November 2015 the Government of Tuvalu announced its (NDCs) in relation to the reduction of greenhouse gases (GHGs) under provisions of the United Nations Framework Convention on Climate Change.

In 2007, Tuvalu was getting 2% of its energy from solar, through 400 small systems managed by the Tuvalu Solar Electric Co-operative Society. These were installed beginning in 1984 and, in the late 1990s, 34% of families in the outer islands had a PV system.

is also mentioned as a future electricity source. Tuvalu's commitment, as part of the , is to implement power generation of 100% renewable energy (between 2013 and 2020). The feasibility of wind power generation will be.
