

# **Türkiye s energy storage power station revenue**

## Overview

---

How can Türkiye provide diversity in energy production & storage?

As a country rich in hydroelectric capacity, Türkiye can provide diversity in energy production and storage by installing pumped storage hydroelectric power plants, a technology over a hundred years old, to its portfolio, while balancing the increasing production of wind and solar.

How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

Where is Türkiye's electricity generation data obtained?

Türkiye's electricity generation data is obtained from the Transparency Platform of the market operator, EPIAŞ. "Real Time Generation" dataset is used for licensed electricity generation, while the "Unlicensed Electricity Generation" dataset is used for unlicensed electricity generation.

How has solar power impacted Türkiye's electricity demand?

The recent increase in solar electricity generation has also played an important role in meeting Türkiye's increasing electricity demand year by year. Electricity demand increased by 5.5% (+18 TWh) in 2024 to reach a record 342 TWh.

How has energy consumption changed in Türkiye?

In the five-year period from 2019 to 2024, Türkiye experienced a 14% increase in electricity consumption (+42 TWh). Three quarters of this increase was met by the rise in wind and solar generation. However, year-on-year imported fossil fuel generation still increased to meet the remaining demand growth.

Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.
