

# **Ukrainian Communications Green Base Station Network**

## Overview

---

- land lines in use: 12.681 million (2011) Upon gaining independence from the USSR in 1991, Ukraine inherited an analogue PSTN telephone system that was antiquated, inefficient, and in many places in disrepair; meanwhile demand overwhelmed the supply with more than 3.5 million households applications for telephone lines pending. Telephone density has since risen and the domestic trunk system is being improv.

How many base stations are there in Ukraine?

"We've had more than 10 percent of our sites completely or partially destroyed," explains Sasha Ananyev, head of the network operation department at Vodafone Ukraine. That's roughly 1,400 base stations, and does not include base stations located in Donetsk and Luhansk, areas that have been occupied by Russia since 2014.

How many telecommunications lines have been seized in Ukraine?

More than 4,000 base stations belonging to Ukrainian telecommunications providers have been seized or destroyed by Russian soldiers since the beginning of the invasion, and more than 60,000 kilometers of fiber-optic lines used for Internet have been captured or damaged, according to Ukraine's Special Communications Service.

How many Ukrainian mobile stations have been rebuilt?

As of Oct. 13, Ukrainian mobile operators have rebuilt 71 of their base stations in towns and cities liberated from Russian occupation since the beginning of the counter-offensive last month, according to figures shared with TIME by Ukraine's Digital Ministry.

What is Ukraine's Telecommunication Development Plan?

Ukraine's telecommunication development plan emphasizes further improving domestic trunk lines, international connections, and the mobile cellular system. During the Russian invasion of Ukraine, telecommunications were provided by the Starlink satellite service.

What percentage of Ukraine's base stations have been destroyed?

His view was shared by another Ukrainian telecoms provider, Lifecell, which also reported around 10 percent of its base stations being destroyed at its peak, at around 900 sites.

Is ukr Telecom still a dominant provider?

Several independent fixed network providers established themselves in the country's retail market, although Ukrtelecom still dominates it. The mobile cellular telephone system's expansion has slowed, largely due to the saturation of the market, which has reached 125 mobile phones per 100 people. Telephones - mobile cellular: 55.578 million (2011)
