

Ukrainian lithium energy storage power supply procurement

Overview

With the European Union needing 200GWh of energy storage by 2030, Ukrainian manufacturers are filling orders faster than a Cossack dancer's footwork. The Dnipro River Valley now hosts what locals call "Battery Alley" – 12 factories spanning 8km. What is the lithium resource potential in Ukraine?

Rare metals are an important component of Ukraine's resource base. According to preliminary estimates, the overall lithium resource potential in Ukraine is quite high. The main lithium deposits are associated with Proterozoic complexes (1,7-2,1 billion years) of alkaline rocks, carbonate and granite pegmatites.

Why is DTEK launching a battery storage facility in Ukraine?

REUTERS/Valentyn Ogirenko/File photo Purchase Licensing Rights KYIV, Sept 11 (Reuters) - Ukrainian private energy firm DTEK has launched the country's largest battery storage facility to ensure stable power supplies in the face of Russian attacks on Ukraine's energy sector, the company said on Thursday.

How important are energy storage systems in Ukraine?

"In the context of large-scale attacks on Ukraine's energy system, the role of energy storage systems has become just as fundamental as energy generation itself," said energy minister Svitlana Grinchuk. (\$1 = 0.8554 euros)
