

# Urban outdoor power supply

## Overview

---

Do you need a secure power supply for an outdoor event?

When holding an outdoor event, a secure power supply is vital. Our retractable supply units and In-ground power units are proven to deliver both a constant and efficient power supply, wherever needed.

What are the different types of outdoor power units?

There are three main units in our range – Pop Up units, Power Bollards and In-ground, also known as Flip lid, all of which provide a range of outdoor power. We offer a range of configurations, as well as bespoke In-ground power units or Pop Up units with recessed tops that can accommodate different forms of surface material such as paving.

Does TSI power offer outdoor xups?

TSI Power's Outdoor XUPS series of rugged outdoor uninterruptible power supplies is the ideal way to supply backup power in extreme environments. TSI Power offers a comprehensive suite of accessories for the Outdoor XUPS. Mounting brackets, battery heaters, maintenance bypass switches, security solutions, and more are available.

What is a fully retractable power supply?

Fully retractable units are installed safely underground until they are needed, they can then be raised to provide a safe and secure power supply. For landscape conformity, each unit can have surface material, matching the surrounding area, inserted in the recessed cover so there is minimal visual impact on the overall area.
