

# Uruguay Valley Power Energy Storage System

## Overview

---

Why does Uruguay have a power grid?

In the same way Uruguay's abundance of wind and rivers proved fortuitous for energy sovereignty, so was the government's oversight of the electric grid.

Is Uruguay a net importer of energy?

Once a net importer of energy, Uruguay now exports its surplus energy to neighbouring Brazil and Argentina. In less than two decades, Uruguay broke free of its dependence on oil imports and carbon emitting power generation, transitioning to renewable energy that is owned by the state but with infrastructure paid for by private investment.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramón Mendéz Galain believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.

Why did Uruguay start using wind turbines?

Avoiding nuclear power entirely, Uruguay first embraced wind turbines as a source of cheap, reliable power; providing 40% of the country's capacity in less than a decade.

## Uruguay Valley Power Energy Storage System

---

### [Uruguay energy storage power plant operation](#)

Uruguay is a 945MW hydro power project. It is located on Uruguay river/basin in Salto, Uruguay. According to GlobalData, who tracks and profiles over 170,000 power plant

### [Product Information](#)

### [Uruguay Battery Storage and Smart Grids](#)

Uruguay is a frontrunner in renewable energy integration in Latin America, with developing potential in the areas of battery storage and smart grid technologies. The country's ...
