

Uzbekistan outdoor power supply parameter configuration

Overview

What determines domestic demand for energy resources in Uzbekistan?

Domestic demand for energy resources is determined by the expected dynamics of economic development, changes in the structure of the economy and the level of its specific energy intensity. Reducing the specific energy intensity of the economy is the main task of the energy policy of Uzbekistan.

How is electricity used in Uzbekistan?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water. of total generation.

When will Power imports & exports equalize?

it is expected that power imports and exports shall equalize by 2030 and reach 6 bln. kWh per annum. Overall power load during peak maximum hours in 2030 is expected to reach over 20.9 thousand MW as opposed to 10.4 MW in 2019 (10.4 thousand MW) by 2030. Figure 8 - Forecast generating capacity to maximum
