

Uzbekistan photovoltaic power generation and energy storage investment and construction

Overview

In 2025 alone, Uzbekistan plans to launch 12 solar power plants, 4 wind farms, and 12 energy storage systems. These projects represent over \$5 billion in investment and will provide a combined generation capacity of approximately 9 billion kilowatt-hours. Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 — The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

How to make solar energy a key energy source in Uzbekistan?

The policy and regulatory frameworks enabling further solar energy deployment in Uzbekistan. Increasing power system flexibility to integrate the increasing amount of solar generation. Finally, the recommended actions are a co-ordinated package of measures to implement to make solar energy the key energy source in Uzbekistan in 2030 and beyond.

What is a large-scale solar PV project in Uzbekistan?

Large-scale solar PV projects have been subject to competitive bidding processes in Uzbekistan since 2019 and an awarded project can sign a long-term contract with NEGU at a fixed tariff, as noted above. The government of Uzbekistan also aims to develop small- and medium-scale solar projects.

How is Uzbek attracting private sector investment in large-scale solar power projects?

As was described earlier, the Uzbek government, with financial and technical assistance from international financial institutions, has implemented competitive bidding processes to attract private sector investment in large-scale solar power projects since the enactment of the Law on PPP in 2019.

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

How can Uzbekistan improve the use of solar energy resources?

To enhance the use of solar energy resources in Uzbekistan, we recommend the government consider incorporating, as appropriate, all measures listed in the roadmap into its solar energy strategy toward 2030 and beyond. BNEF (Bloomberg New Energy Finance) (2019), Industrial Heat: Deep Decarbonization Opportunities.

Uzbekistan photovoltaic power generation and energy storage investment

[Uzbekistan to launch 16 green power plants by year-end](#)

In particular, by the end of this year, 12 solar and 4 wind power plants, along with 12 energy storage systems, will be launched. The total investment in these projects will ...
