## Overview

---

Will the Vatican build an agrivoltaic system?

The Holy Father has tasked the relevant Vatican governing bodies to collaborate with Italian authorities and build an “agrivoltaic system,” which would use land in Santa Maria di Galeria, an extra-territory of Vatican City situated outside of Rome, for farming and solar energy production.

Will Vatican City be able to use solar energy?

Catholic News Agency, 2024-06-26 Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled Fratello Sole, or “Brother Sun.”.

Does the Vatican have a green energy policy?

The Vatican’s commitment to green energy is further exemplified by its partnership with the utility company Acea, which now supplies the state with electricity exclusively from renewable sources. This shift ensures that all the energy consumed within the Vatican’s walls is entirely green, setting a powerful example for the global community.

Is the Vatican promoting electric mobility?

In addition to harnessing solar power, the Vatican is also making strides in promoting electric mobility. The installation of 35 electric vehicle charging stations throughout the city-state is a clear indicator of this commitment.

Will a Vatican Radio station be installed in 2025?

The future installation would be projected to “ensure, not only the power supply of the radio station existing there, but also the complete energy support of Vatican City State,” he wrote. Fast forward to 2025, and the project is completed.

What is the Vatican's sustainability strategy?

**Sustainable Resource Management and Renewable Energy: A Holistic Approach** A cornerstone of the Vatican's sustainability strategy is the responsible management of natural resources like water and energy.
