

What are the wind and solar complementary technologies of Huijue Communication base stations

RS485
Communication between battery and inverters
Baud rate:9600bps

RS485 Interface
Communication between parallel packs or BMS and PC
Baud rate:9600bps

Overview

It has launched a hybrid energy solution centered on “photovoltaic + wind energy + lithium battery energy storage + intelligent energy management platform”, comprehensively enhancing the operational efficiency of base stations and assisting operators in accelerating the upgrade of 5G infrastructure. What are Huijue group's energy storage solutions?

Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station energy solution.

How does the Huijue mobile power station work?

The Huijue Mobile Power Station uses a complementary system combining wind, solar, and diesel. When wind and solar aren't sufficient, the diesel generator kicks in as a backup, ensuring a stable power supply. This hybrid approach makes it ideal for remote sites where energy reliability is crucial.

What is a Huijue system?

Ranging from 5kWh to 20kWh, it caters to households of varying sizes. It reduces electricity bills and serves as emergency backup power, providing a seamless, intelligent, and one-stop energy solution. Compact and reliable Huijue systems provide energy independence and efficiency for modern homes.

What is a Huijue mobile wind power station?

Huijue Group's 15kW mobile wind power station is housed in a 20-foot container that can be towed by any regular vehicle. Designed to operate efficiently at low wind speeds, it's an ideal solution for areas that would otherwise rely on diesel generators, which are both costly and environmentally taxing.

What is Huijue off-grid solution?

Huijue Off-Grid Solution integrates photovoltaic, energy storage, and off-grid systems for scalable energy self-sufficiency. The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.
