

Which companies have green base stations in Sweden

Overview

How is Sweden contributing to the green transition?

Sweden is contributing to the green transition. Here are some examples how. Sweden's innovative landscape is vast and vibrant, with many Swedish companies contributing. This is due to factors such as financial support for startups and general openness towards creative solutions.

Will Sweden be able to electrify transport?

By 2030, Sweden is expected to have 2.5 million rechargeable vehicles in traffic. At the same time, electricity consumption is expected to increase by 60 per cent till 2045. With that being said, the race to electrify transport is not confined to the roads. A standard 7.5-metre petrol boat consumes substantially more fuel than a family car.

How does a mobile base station work?

By combining fossil-free hydrogen, fuel cells, solar panels, and batteries, this innovative solution sets a new standard for ensuring connectivity during prolonged power outages. Today, mobile base stations primarily rely on electricity from the power grid, with batteries and diesel generators providing backup.
