

Which outdoor power supply is safe in Malawi

Overview

What type of plug does Malawi use?

It is important to note that it does not convert the voltage or frequency. For Malawi the associated plug type is G, which is the plug that has three rectangular pins in a triangular pattern. Malawi operates on a 230V supply voltage and 50Hz. Electricity supplies worldwide can vary from anything between 100V and 240V.

What is the electricity supply voltage in Malawi?

Malawi operates on a 230V supply voltage and 50Hz. Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply.

What is the access to electricity in Malawi?

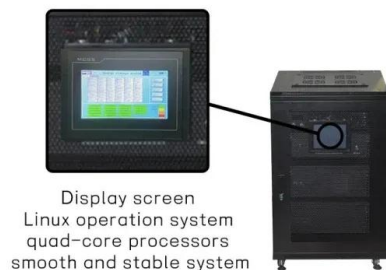

Access to electricity in Malawi is very low, with domestic users accounting for around 25% of the total electricity consumption.

Do I need a converter or transformer for Malawi?

This means that you will not need a converter or transformer but just a travel adaptor, because Malawi operates on a 230V supply voltage, which is within the 110-240V range that the dual voltage appliance operates on. In Malawi the supply voltage is 230V.
