

Wind solar and storage electricity prices in Côte d Ivoire

Overview

Can decentralized solar mini grids support energy access in Côte d'Ivoire?

The study is determining the viability of building and operating decentralized solar mini grids to support energy access for up to 100 unelectrified communities comprising 190,000 persons in Côte d'Ivoire. The MMPE is implementing the project through its Direction Générale de l'Énergie.

Will Côte d'Ivoire have a low-cost solar system?

In the case of a low-cost solar scenario, PV capacity is up to 24 GW and storage is nearly 15 GW between 2030 and 2050. In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades.

Does Côte d'Ivoire have a commitment to green energy?

According to its National Determined Contribution (NDC) of 2015, the share of green energy in the electricity mix is expected to reach 42% and greenhouse gas (GHG) emissions from this sector are not expected to exceed 9.2 Gt of CO₂ eq in 2030. To date, Côte d'Ivoire has not made any other quantitative commitment beyond 2030.

Will solar power supply increase in Côte d'Ivoire by 2050?

We develop a TIMES model of the electricity sector for Côte d'Ivoire that provides least-cost solutions for power systems. Our estimates show that electricity demand could increase by a factor of 4.5 by 2050. Least cost solutions show that solar PV could provide at least 18% of total electricity generation in 2050.

How much does LNG cost in Côte d'Ivoire?

For Côte d'Ivoire, the cost of delivered gas has been estimated at between \$9 and \$11/MMBtu if supplied by the WAGP extension and between \$10 and \$12.7/MMBtu for LNG based on assumptions on the degree of international

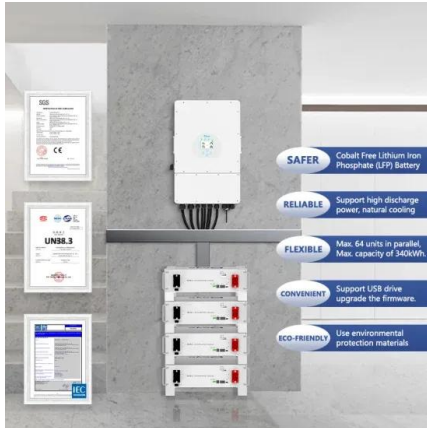

price convergence. We assume an evolution of \$9 to \$10/MMBtu for WAGP and a constant value of \$12/MMBtu for LNG.

Will Côte d'Ivoire have a coal-fired power plant?

These aspects are left for further research. This coal-fired power plant is expected to be the first ever built in Côte d'Ivoire. Note that the implicit price of carbon for the other scenarios is not worth studying because they show CO₂ emissions in 2050 below the Paris Agreement target.

Wind solar and storage electricity prices in Côte d'Ivoire

[Africa Energy Futures: Côte d'Ivoire](#)

What are the key investment opportunities in the energy and natural resources sectors over the next 5 to 10 years? The Côte d'Ivoire energy minister recently announced the ...
