

# **Yemen Distributed Energy Storage BESS**

## Overview

---

Can a US integrator deploy a Bess system?

versus those in the U.S. (Figure 26). Figure 26, a U.S. integrator can deploy BESS systems branded under the domestic company's name but which still use battery packs (e.g., via CATL), BMS, and inverter hardware (e.g., Sungrow) provided by PRC manufacturing companies. Comparing the risk factors a US integrator using the same componen.

What are the most important standards for energy storage?

allenges for their widespread adoption. Key standards in progress include IEEE 1547.3 for energy storage integration,<sup>143</sup> UL 2941 for system safety,<sup>144</sup> and SunSpec Modbus for communication protocols.<sup>145</sup> Despite their importance, standards development can be slow due to consen.

Does Bess have a cybersecurity impact potential?

o personnel (e.g., electrocution). BESS also has cybersecurity impact potential both through its connection with other cybersecurity components within a single system as well as its connections to external cybersecurity components, including site, fleet, or utility networks, amplifying -with-6-
